

Hello Alteryx UK

From today, we are announcing a new cashback benefit for COVID-19 for all VitalityHealth members who are hospitalised in the NHS due to Coronavirus. This new benefit will pay £250 per day for any admission as a result of COVID-19, increasing to £500 a day from the eighth day of hospitalisation, up to a maximum of £5,000.

This approach has been informed by research from the Imperial College Covid-19 Response Team, which indicates that on average, after day eight critical care is more likely to be required, and a larger daily cash benefit is therefore appropriate.

For our VitalityLife members, I want to reassure you that any claim related to COVID-19 across our Life cover, Serious Illness and Income Protection plans will be met*. Further details on this can be found in our [Coronavirus FAQ's](#) on our website.

Finally, our team is working hard to look how we can adapt the Vitality Programme, to help you to stay healthy and active during these unprecedented times. I hope to be able to share a further update with you all on this next week.

Best wishes,

Neville Koopowitz
Chief Executive Officer
